INTRODUCTION

WELCOME TO THE ZEROTECH SPOTING SCOPE

Customer First - We listened to you and came up with a spotting scope that will satisfy the needs of our most discerning and experienced customers.

Backed by Experience - ZeroTech enjoys 60 years of experience in the Optics Market supplying high quality brands to retailers throughout Australia and the Asia Pacific.

Lifetime Warranty - At ZeroTech we are hikers, travellers and outdoors adventurers. We understand that the reality of your adventure can sometimes result in harsh conditions and damaged products, and that is why we will back you, and our product through life and through adventure.

'ANY OWNER, ANY PROBLEM, ALWAYS COVERED'

LIFETIME WARRANTY

BACKED FOR LIFE!

Be safe in the knowledge that your spotting scope is backed by our **Triple A Lifetime Warranty**:

- Unconditional lifetime replacement or repair*.
- Regardless of the fault or the reason, ZeroTech products will be covered for the life of the product*.
- The Warranty is fully transferable, if you sell the spotting scope the warranty automatically goes with it.

*ZT AAA warranty does not cover any intentional loss or damage to ZeroTech products.

LIFETIME WARRANTY

**'ANY OWNER, ANY PROBLEM,
ALWAYS COVERED'**

SPOTTING SCOPE FEATURES - THRIVE 20-60x85

USAGE TIPS

1. Never use your spotting scope to look directly at the sun.
2. Always ensure your spotting scope is securely mounted to your tripod head before use. The Thrive 20-60x85 spotting has an integrated ARCA Swiss dovetail, as well as a conventional 1/4x20 thread on the base for use with standard tripod QD plates or direct thread mounting options.
3. Make sure your tripod system is rated for use with spotting scopes. The Thrive 20-60x85 spotting scope weighs 1885g (66.5oz).

USAGE TIPS

4. Adjust the magnification power change ring to the lowest setting (20x) when acquiring your intended point of interest. This will enable you to have the largest field of view possible and make searching for your point of interest much easier.
5. Use the focus adjustment ring to bring the image into clear focus.

CARING FOR YOUR SPOTTING SCOPE

1. Wipe dust and debris from your scope body using a damp microfibre cleaning cloth.
2. If necessary, clean dust and dirt from the scope lenses using a lens brush and the ZeroTech lens cleaning cloth.
3. Never spray cleaners or solvents on any part of your scope.
Irreversible damage may be caused by such products.
4. Avoid touching the scope lenses. Wipe fingerprints off the scope lenses using the ZeroTech lens cleaning cloth.
